AUTOMATE™
A DIVISION OF ROLLEASE ACMEDA

HomeKit Quick Start Guide
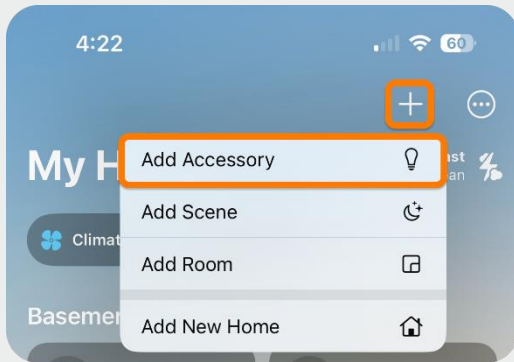

GETTING STARTED:

Before connecting to HomeKit, please ensure your Pulse PRO Hub and motorized shades have been setup and are working from within the Automate Shades app.

You will also need a Matter-compatible, HomeKit hub/smart speaker already linked to your Home account.
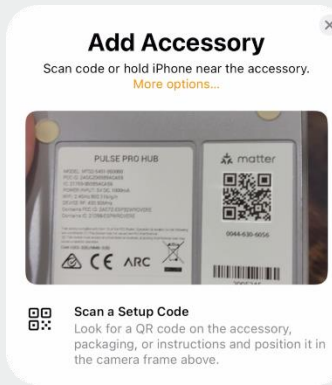

To control shades with Home, you will need the following:

1. Automate Pulse PRO Hub that has been set up.
2. Working shades within the Automate Shades app.
3. Home app and Apple ID account.
4. A Matter-compatible hub/smart speaker set up.

1. In the **Home** app, select **+** and then **Add Accessory**.

2. Scan the **Matter** QR code found on the bottom of the **Automate Pulse PRO Hub**.

**NOTE**: Ensure you have a Matter-compatible, HomeKit hub/speaker already set up.

3. Select the option to **Add to Home**.

Support Resources: For further assistance, contact your retailer, or visit our website at www.automateshades.com
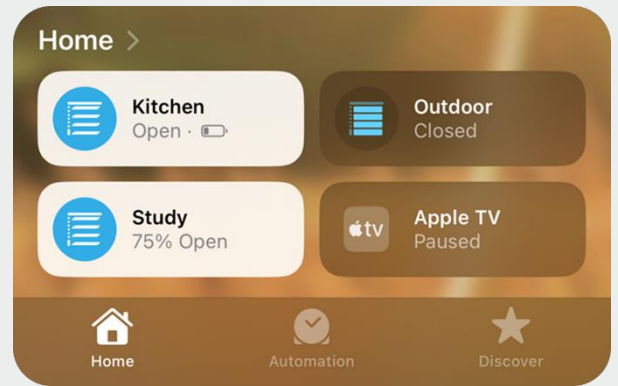

4. Choose a location for your Pulse PRO Hub and then select **Continue**.

5. Name your Hub and then select **Continue**.

6. You'll see the shades on the **Home** page; you can control them from here.

7. Test voice commands. Example commands:

"Siri, **open** kitchen shade"
"Siri, **close** den blind"
"Siri, **activate** bedtime automation"
"Siri, **raise** the blackout shade"
"Siri, **set** bedroom shade to **22%**"

HomeKit Automations:

Please note that **Rooms**, **Scenes**, and **Timers** set in the **Automate Shades** app do not carry over to HomeKit. **Automations** can be created in HomeKit to achieve similar functionality. For more details, visit support.apple.com and search for **Automations**.
